Minnesota Teacher Pay Remains Below the National Average

Washington, D.C.—Minnesota's average teacher salary for 2002-2003 was up slightly from the year before, but still remained more than \$1,000 below the national average, according to the American Federation of Teachers' annual teacher salary survey released Thursday. The average pay for beginning teachers in Minnesota ranked even lower.

Minnesota ranked 19th in the nation for its 2002-03 average teacher salary, at \$44,745. Minnesota also ranked 30th for its average beginning teacher salary in 2002-03, at \$28,600. The AFT estimates that Minnesota's average starting salary for the most recent school year, 2003-04, was \$29,515.

Regionally, Minnesota's 19th position outranked nearby states. Wisconsin was 27th, at \$41,617; Iowa was 40th, at \$38,000; North Dakota was 49th, at \$33,869; and South Dakota was 51st, at \$32,414.

Across the country, teachers' salaries remained relatively stagnant while their share of health benefits rose at all-time rates, making it difficult to attract and keep good teachers at a time when they are increasingly needed, the report said.

Nationally, the 2002-03 average teacher salary, which is the most recent figures available, was \$45,771, up 3.3 percent from the previous year, and the average beginning teacher salary was \$29,564, up 3.2 percent from the year before. But AFT's report noted that teachers' share of health insurance costs spiked an average 13 percent, according to the Bureau of Labor Statistics.

"Exorbitant health insurance costs are taking an intolerable bite out of already inadequate teacher salaries. Teachers are being asked to do more, shortages persist in the most challenging areas to teach, yet compensation packages are insulting," said AFT Secretary-Treasurer Edward J. McElroy.

Furthermore, the AFT noted, superintendents' average salaries are as much as four times higher than teachers' average pay. "States and school districts are crying poverty when it comes to teachers' pay yet somehow find money for extravagant administrator salaries," McElroy said.

California led the nation with the highest average teacher salary for 2002-03, at \$55,693. South Dakota had the nation's lowest average teacher salary, at \$32,414. Alaska led the nation with the highest average beginning teacher salary for 2002-03, at \$37,401. Montana had the nation's lowest average beginning teacher salary, at \$23,052.
