Colorado Ranks 21st in the Nation for Teacher Pay Teacher Salary in Colorado Falls Behind Inflation

Teachers Nationally Earned 18 Cents for Every New Dollar in Other Professions from 1994-2004

WASHINGTON, D.C.—Colorado ranked 21st in the nation for its average teacher salary in 2003-04, according to the American Federation of Teachers' (AFT) annual teacher salary survey, released today. Colorado was one of 28 states where the increase in average teacher salary was *lower* than the national rate of inflation.

The average teacher salary in Colorado for the 2003-04 school year was \$43,318, up 1.5 percent from the previous year. Colorado ranked 19th in the nation for average beginning teacher salary, at \$31,296, a decrease of 2.5 percent from 2002-03.

Nationally, average teacher salary growth failed to keep up with inflation for the first time since the 1999-2000 school year. The average teacher salary in 2003-04 was \$46,597, an increase of 2.2 percent from 2002-03. The national rate of inflation in 2004 was 2.7 percent. When adjusted for inflation, the 2003-04 salary is actually a drop of 0.4 percent from 2002-03.

“Current salaries fail to reflect the professional qualifications, preparation and challenges that teachers must meet every day in the classroom,” said AFT President Edward J. McElroy. “At the very least, teachers’ pay should be a measure of their educational backgrounds and the demands of their jobs. Teachers, like all workers, deserve a salary that enables them to comfortably support themselves and their families.”

The survey also reports that, from 1994-2004, compensation for teachers, after adjusting for inflation, increased at a far slower rate than salaries earned by other professionals, with teachers gaining just 18 cents for every new dollar earned by private sector workers with similar educational backgrounds.

Other states in the Rocky Mountains region ranked in the AFT survey as follows: Idaho was 32nd in the nation, at \$40,111; Wyoming was 36th, at \$39,537; Utah was 38th, at \$38,976; and Montana was 45th, at \$37,184.

Connecticut had the highest average teacher salary at \$56,516, while South Dakota reported the lowest at \$33,236. Alaska led the nation with the highest average beginning teacher salary for 2003-04, at \$40,027. Wisconsin had the nation’s lowest average beginning teacher salary, at \$23,952.
