

The Affordable Care Act and Higher Education

Amy Clary

Associate, AFT Research and Strategic Initiatives

Outline

- Exchanges
- Subsidies/penalties
 - What might employers do?
- Rules and regs: What you need to know for bargaining
- Contingent faculty: what the law says; what the employer says the law says
- Preparing for bargaining
- Scenarios

What does the ACA do?

- Expands coverage. By 2014, most people must have health insurance or pay a penalty.
- The ACA helps people obtain coverage in two primary ways:
 - Medicaid expansion
 - Exchanges
- Consumer protections, no pre-existing condition discrimination (2014)
- Delivery system reforms (ACOs, PCMHs)
- Emphasis on prevention, wellness, primary care

3

Individual mandate

- Minimum coverage provision:
 - Beginning in 2014, individuals are required to have insurance unless exempt.
 - This is the “individual mandate”
- Penalty for not having coverage the greater of :
 - 2014: 1% of income or \$95
 - 2015: 2% of income or \$325
 - 2016: 2.5% of income or \$695
 - Per person, but capped at 3x that amount for a family
 - Penalty will not exceed the average premium of a bronze plan in the exchange

4

Exchanges: Timeline

Oct. 2013

- Open enrollment begins for individuals and small businesses

Jan. 1, 2014

- Exchange coverage begins
- Premium tax credits available

<http://cciio.cms.gov/resources/factsheets/hie-blueprint-states.html>

5

Exchanges: the basics

- “Marketplaces”
- Four tiers of coverage
 - Platinum pays for 90% of your covered costs
 - Gold: 80%, Silver: 70%, Bronze: 60%
 - States may also offer a catastrophic plan to those under 30, and/or a basic plan for the uninsured with incomes 133-200% of FPL
- Subsidies based on second-lowest-cost silver plan
- The average large employer plan pays for more than 80% of expected costs

<http://www.kff.org/healthreform/upload/8177.pdf>

6

Notification requirement

Employers will have to notify all new and current employees about:

- the existence of the exchange
- the services the exchange offers, and
- how to contact the exchange
- Notices will probably be due in late summer or fall of 2013, to coordinate with exchange open enrollment

<http://www.dol.gov/ebsa/faqs/faq-aca11.html>

7

Exchanges: Subsidies

Subsidies are not available to employees who have an offer of employer-sponsored coverage that meets certain requirements UNLESS:

- The employee's household income is at or below 400% of the federal poverty line, AND
 - The employee's share of the self-only premium for the employer's lowest-cost plan is more than 9.5% of the employee's household income
- 400% of the 2013 FPL for a family of 4: \$94,200
 - 9.5%* of \$30,000: \$2,850 (approx. \$238/mo.)
 - 9.5%* of \$40,000: \$3,800 (approx. \$317/mo.)

*this percentage will be indexed after 2014.

http://www.cbo.gov/sites/default/files/cbofiles/ftpdocs/121xx/doc12188/05-12-subsidies_in_exchanges.pdf

8

Employer penalties

- The “fair share” penalties apply to large employers, defined as those with more than 50 FT equivalents.
- Penalties apply if at least one full-time employee (30 or more hrs/week) receives a premium credit in the exchange
- Two kinds of penalties:
 - a. Failure to offer coverage to FT employees and their dependent children up to age 26
 - b. Failure to meet affordability test. Coverage is offered, but employee qualifies for exchange subsidy

9

Employer Penalties

- If the employer does not offer insurance and one or more FT employee gets an exchange subsidy, the penalty is \$2000/yr x number of FT employees minus 30
 - If no FT employee receives a subsidy, no penalty will be levied against the employer
- Recent regulations say that the penalty only applies if less than 95% of FT employees are offered coverage

10

Educational employees: Who is full time?

For ongoing employees of educational organizations who have an "employment break period" of at least four weeks (such as during the summer), employers using the "look back" method must either:

- Calculate average hours worked per week excluding the break period, or
- treat the employee as having worked their average weekly hours during the "employment break" period

11

Educational employees: Who is full time?

- This means that employers cannot choose June, July, and August as the measurement period for employees who work during the school year
- There is also an anti-abuse clause
 - if the employer requires someone to work for the purpose of interrupting what would otherwise be a four-week or longer "employment break," the employee will be considered as having an employment break

AFT National has been active on this issue

12

Recent Regulations

- No employer penalty for failing to offer coverage to the spouses of full-time employees
- Family members' eligibility for exchange subsidies based on affordability of self-only coverage
- No failure-to-offer penalty for employers who offer coverage to 95% of full-time employees and their dependent children.

13

What Might Employers Do To Avoid Penalties?

- Cut hours below 30 hours per week
- Make sure the employee share of single coverage is slightly less than 9.5% of the lowest-paid employee's pay
- Institute a new low-cost, high-deductible plan
- Shift costs to family coverage (single costs the employee little or nothing; family costs a lot)

NOTE: The ACA does not supersede collectively-bargained language, including language on hours of work, benefits, or benefits eligibility

14

Know what the government does and does not require:

- Remember that the ACA sets a floor, not a ceiling
 - If the institution claims that the law sets a clear threshold for “full time” status for contingent faculty, challenge them.
- “employers always can treat more employees as eligible for coverage, or otherwise offer coverage more widely, than would be require to avoid an assessable payment...” *Federal Register*, Jan. 2, 2013

15

Who is full time?

- the ACA requires large employers to offer affordable insurance to FT employees or pay a penalty (30hrs/week on average).
- Employers can calculate FT ees monthly, or use a “look-back measurement method” to determine FT status.
- Employers can choose a measurement period of 3-12 months.
- If the employee was full-time during that period, he/she is considered FT for a subsequent “stability” period (the greater of 6 mos. or the length of the measurement pd.)

16

Are contingent faculty considered full time? (cont.)

- Do colleges and universities have to insure their contingent faculty or pay a penalty?
- A recent federal proposed rule addresses this question for the first time:

17

Federal Register, Jan. 2, 2013

“Employees Compensated on a Commission Basis, Adjunct Faculty, Transportation Employees and Analogous Employment Positions”

“Until further guidance is issued, employers ... must use **a reasonable method** for crediting hours of service...” [emphasis added]

<http://www.gpo.gov/fdsys/pkg/FR-2013-01-02/pdf/2012-31269.pdf>

18

Federal Register, Jan. 2, 2013

“it would not be a reasonable method of crediting hours ... in the case of an instructor, such as an adjunct faculty member, to take into account only classroom or other instruction time and not other hours that are necessary to perform the employee’s duties, such as class preparation time.”

<http://www.gpo.gov/fdsys/pkg/FR-2013-01-02/pdf/2012-31269.pdf>

19

What does that mean?

- It means that unless more specific regs come out, colleges and universities are allowed to decide for themselves whether any contingent faculty work 30 or more hours per week, as long as the institution claims its standard is “reasonable.”
- The section of the Jan. 2, 2013, *Federal Register* excerpted in the previous slides is the only official mention of adjuncts or contingent faculty anywhere in the ACA or federal regulations related to ACA implementation.

Don't let colleges use the ACA to abuse contingent faculty

As the Affordable Care Act reaches implementation, questions remain regarding how contingent faculty will be treated when the act fully takes effect in 2014. The AFT has been in discussions with the U.S. Treasury Department on many aspects of the ACA and its definition of "full time" for the purpose of the employer penalty, but the department wants to hear from individuals, too.

Some colleges have jumped the gun on this unresolved issue, cutting back on the number of hours they are assigning to part-time faculty.

The Treasury Department has requested comments by March 18 this year. It is important that adjuncts, their unions, and faculty and staff colleagues communicate their experiences and concerns.

Here is information about the ACA and how you can contact the IRS.

Defining "full time"

Starting in 2014, the Affordable Care Act levies penalties against large employers (those with at least 50 employees) that do not offer affordable health coverage to their full-time employees. The law defines a full-time employee as one who works at least 30 hours per week on average. On Jan. 2, Treasury issued proposed rules regarding the determination of full-time status for the purpose of the employer penalty for failing to provide full-time employees with health coverage. Even though these are "proposed" rules, employers can rely on them unless final rules are issued. **Note that the Affordable Care Act does not supersede collectively bargained language, including contract language on benefits eligibility or teaching load.**

The AFT is weighing in

Institutions Cutting Courseloads: Possible Strategies

- Offer insurance?
 - How much would it cost the institution to offer minimum essential coverage? Is there a low-premium group plan that institutions could offer to contingent faculty?
 - One consultant says that the “\$2,000-per-worker penalty...is really closer to \$3,500 once the underlying tax breaks for coverage are thrown into the mix”
 - Such a plan could cover those who need it, allow the institution to do the right thing, and resolve the issue of course load limits

<http://www.politico.com/politicopulse/1012/politicopulse1262277>

23

Possible Strategies, cont.

- Communications
 - The ACA requires people to have insurance, and requires large employers to offer coverage to their full-time workers.
 - Can a communications strategy be developed around this point?

24

What about rehired employees?

For employers using the look-back method, an employee can be considered new (i.e., terminated and rehired) for purposes of the measurement period and waiting period IF:

- the break in service is at least 26 consecutive weeks long,
- OR the break in service was at least 4 weeks long (but less than 26 weeks) AND is longer than the previous period of employment
- The employer chooses which method to use

Federal Register, Jan. 2, 2013

25

90-day waiting period

- Employers do not have to offer coverage during a new employee's first three months of service

26

Preparing for 2014: Collect info

Employer's strategy

- keeping employees out of exchanges?
- avoiding penalties?
- avoiding adverse selection?
- reducing hours?
- grandfathered status?
- dropping coverage altogether?

Members' priorities

- keeping union-negotiated coverage?
- lowest premium possible?
- lowest out-of-pocket costs possible?
- most comprehensive plan possible?

27

Preparing for 2014: Collect info

Member census

- who is not offered coverage?
- who pays more than 9.5% of household income for lowest-cost single coverage?
- who works less than 30 hours per week? Who works exactly 30 hrs/wk?
- household income at or below 400% FPL?
- who needs coverage for spouse and/or children?
- would any members be better off in the exchange?

28

Who has coverage through the employer?

- Are members offered any coverage under the employer's health plan?
 - The answer is "yes" if an employee has the opportunity to purchase coverage in the employer's group plan, even if the employer does not contribute anything towards the premium.
- If yes, how many members are enrolled in health insurance coverage through the employer?
 - How many have single coverage?
 - How many have 1+1 or family coverage?

29

Members who ARE offered coverage under the employer's health plan

- How much of the premium do members pay for self-only (individual) coverage in the employer's lowest-cost plan?
- Is this amount greater than 9.5% of any member's household income?
- If so, that employee may be eligible for a subsidy in the exchange, if his or her household income is at or below 400%fpl

30

Who has coverage, but not through the employer?

- Employees are generally not eligible for exchange subsidies if they have insurance coverage through a spouse or partner, or through a retiree healthcare plan or a program such as Medicare or Medicaid.

31

Who is NOT offered coverage under the employer's health plan?

- Employees who do not have health coverage available to them through their employer may be eligible for subsidized coverage through the health insurance state exchanges.
- Even if they are not eligible for subsidies because their household income is too high, the exchanges may be a welcome option for them.

32

Poll: 84% of employers are “very likely” to or “definitely will” continue to provide employer-sponsored health coverage

Top 3 reasons for continuing to provide health care coverage:

http://www.ifebp.org/AboutUs/PressRoom/Releases/pr_120612.htm

33

Bargaining considerations

Excise (“Cadillac”) Tax (2018)

- Threshold: plan cost exceeds \$10,200/\$27,500 (single/family)
- Includes FSAs, HSAs (employer & employee payroll deduction), HRAs
- Vision and dental excluded
- Tax is 40% of the amount that exceeds the threshold

Wellness programs

- Carrots or sticks?
- Based on participation or results?
- On-site clinics?

Healthcare committee

- With authority?
- With release time?
- Transparency and data sharing

34

ACA Bargaining considerations

Plan offerings and design

- Beware of new low-cost plan (to disqualify members from exchange subsidies)
- Exchange supplement possibilities?
- Avoiding excise tax ("Cadillac tax")
- Can members drop out of employer's plan?
- Strategic cost-sharing; emphasis on quality
- Defined contribution

Calculation of hours for FT status

- Use and length of look-back measurement period

MLR rebates (fully-insured only)

- How are they distributed?

35

Scenario 1: Employer stops offering health coverage

Upside	Downside
Healthcare costs will take up less of the employer's money at the bargaining table, potentially leaving more for wages	Exchange coverage will not be as comprehensive as employer-sponsored coverage and will have greater out-of-pocket costs.
The union can try to bargain for more money to compensate for the loss of the coverage	Employees will not be able to bargain with employers over plan design, plan quality, and cost sharing
	Employers may not give members significantly more in wages to compensate for the loss of this benefit
	Members may ask what the union's purpose is if not bargaining benefits
	The employer will have to pay penalties to the federal government

36

Scenario 2: Employer continues to offer coverage

Upside	Downside
Employees can continue to bargain over plan design, plan quality, and cost sharing	Healthcare costs will continue to rise, crowding out wage increases. Employers will keep shifting costs to employees.
Members will continue to credit the union with bargaining good benefits for them	If exchanges work well and employer-sponsored coverage becomes increasingly unaffordable, members may wonder why the union encourages them to stay in the employer's plan.
Members will, in general, have coverage that is much more comprehensive than that sold on the exchanges	

37

Additional ACA provisions

- CO-OP plans
- Transparency provisions:
 - W-2 reporting
 - disclosure of financial relationships between doctors and drug companies and device manufacturers
 - rate review
 - Summary of benefits and coverage
- Medicaid expansion

38

Transparency Provisions

- W-2 Reporting of Value of Health Benefits
 - Now on W-2s. This does not mean that the value of your health benefits is being taxed.
- Rate review for individual and small-group plans. Rate review data available at <http://companyprofiles.healthcare.gov/>

[A summary of the health reform law is available here >>](#)

Notes

Based on the Patient Protection and Affordable Care Act (including subsequent amendments in the Health Care and Education Reconciliation Act of 2010), as signed by the President.

The premiums are illustrative examples in 2014 dollars derived from estimates of average premiums for 2016 from the Congressional Budget Office. For a 40 year old single adult, the premium for a silver plan is assumed to be \$4,500 for a plan with a 70% actuarial value. To the extent that actual expected enrollment in 2014 differs from what CBO assumed for 2016 — e.g., it has a different composition of people by health status or age

Results

Note: Subsidies are only available for people purchasing coverage on their own in the Exchange (not through an employer). All individuals and families with incomes at or below 133% of the federal poverty level will be eligible for Medicaid. Others with higher incomes may also be eligible, depending on rules that vary by state.

Projected income in 2014	\$70,000 <small>299% of poverty</small>
Unsubsidized health insurance premium in 2014 adjusted for age	\$14,245 <small>(Based on an age factor relative to a 40 year-old of 1.17)</small>
Maximum % of income the person/family has to pay for the premium if eligible for a subsidy	9.47%
Actual person/family required premium payment	\$6,626 <small>(which equals 9.47% of income and covers 47% of the overall premium)</small>
Government tax credit	\$7,619 <small>(which covers 53% of the overall premium)</small>
Out-of-Pocket Costs	<p style="font-size: x-small; margin: 0;">The maximum out-of-pocket costs the person/family will be responsible for in 2014 (not including the premium) is \$6,250. Whether a person or family reaches this maximum level will depend on the amount of health care services they use. Currently, about one in four people use no health care services in any given year. The guaranteed plan for the person/family will have an actuarial value of 70%. This means that for all enrollees in a typical population, the plan will pay for 70% of expenses in total for covered benefits, with enrollees responsible for the rest. Specific provisions like deductibles and copayments may vary</p>

Kaiser Family Foundation:
kff.org

The implementation timeline is an interactive tool designed to explain how and when the provisions of the health reform law will be implemented over the next several years.

You can show or hide all the changes occurring in a year by clicking on that year. Click on a provision to get more information about it. Customize the timeline by checking and unchecking specific topics.

24

The screenshot shows the HealthCare.gov website interface. At the top, a red arrow points to the 'HealthCare.gov' logo in the browser's address bar. The website header includes the logo, navigation links (Home, Blog, Newsroom, Videos, FAQs, Glossary, Text Size A A A, En Español), and a search bar. Below the header are several navigation buttons: 'Find Insurance Options', 'Get Help Using Insurance', 'The Health Care Law & You', 'Comparing Care Providers', and 'Prevention & Wellness'. The main content area is titled 'What's Changing and When' and features a timeline from 2010 to 2015. A specific event is highlighted for January 1, 2013, under the heading 'IMPROVING QUALITY AND LOWERING COSTS' and 'Improving Preventive Health Coverage'. The text describes the expansion of preventive care services for Medicaid patients. An image of a child being examined is shown to the right of the text.
