

Did you know?

American students rank 25 out of 34 in Math and Science Skills

We must do better. Learn about an exciting next step in education that is coming to our classrooms.

Common Core State Standards are a clear set of shared goals and consistent practices being implemented in our classrooms K through 12. This important initiative has been developed to ensure our students, no matter where they live, will be focused on graduating from high school prepared for post-secondary education and careers.

CommitToTheCore.org

- To ensure our kids can meet college and workplace expectations
- To compete in the world
- To succeed in life
